

Aditya Raotole

Product Designer

Surat, Gujarat, India | +91 81608 14734 | adityaraotole@gmail.com | adityaraotole.com

Summary

Product designer with 4 years of experience across product and UI/UX design. The last year has been product design for a multi-market fintech wallet, live in Oman and Tunisia with more markets on the way, covering payments, remittance, KYC, cards, loyalty, and more. The three years before were in UI/UX design across client products on web, mobile, and TV. Works end to end, from problem to shipped screens, with a strong focus on design systems and consistency across markets and languages.

Experience

Product Designer, Ooredoo Fintech (walletii)

September 2025 – Present | Remote

- Designing across multiple markets, currently live in Oman and Tunisia, adapting a single wallet product to each market's rules, currency, and language.
- Working across core fintech areas including payments, international money transfer and remittance, KYC and wallet limits, cards, loyalty and rewards, onboarding, and account management.
- Turning product requirements into detailed interaction flows, prototypes, and final UI for mobile, ready for development handoff.
- Maintaining and improving the current design system, adding new components and features, and building currency variables that let the app switch context between markets.
- Started a new design system from scratch to replace the aging one and continuing to build it in parallel with product work, including an early proof of concept using variables for theming and market switching.

UI/UX Designer, Logicwind

August 2022 – August 2025

- Designed UI and UX across web, mobile, and TV for client products in healthcare, SaaS, B2B, B2C, and media, from early concepts and prototypes through to final handoff.
- Built a shared design system from scratch, used by 11+ team members, that became the base for new client projects and cut down repetitive setup while keeping design consistent.
- Introduced Figma variables to the team and put them into use in live projects, and kept the system current as Figma released new features.
- Worked directly with clients to understand their needs and turn them into clear design solutions.
- Partnered with product managers, developers, and other stakeholders to move designs into development and shipping.

Freelance Work

2023 – 2026

- Designed a set of 3D icons for the walletii app as a freelancer, before joining full-time as a product designer.
- Designed and built client websites in Framer, with no coding involved.

Skills & Tools

Design: Product Design, UX/UI Design, Design Systems, Interaction Design, Wireframing, Prototyping, Responsive Design, 3D Design

Tools: Figma, FigJam, Framer, Adobe Photoshop, Adobe After Effects, Blender, ChatGPT, Claude, Midjourney
